Forecast for Tuesday 18 Jun 2024

Weather: Generally dry overnight but becoming mostly cloudy. Some isolated light showers are possible in the north and west. Mainly dry and largely cloudy through the morning, but with some brighter spells, particularly in southern and eastern areas early on. Sunny spells developing more widely by the afternoon. Most places remaining dry, but a chance for one or two isolated light showers to develop in the east of the Park. Dry, with good clear spells expected by the evening.

Chance of cloud-free hill tops above 800m: 30% around the Snowdon/Yr Wyddfa Range at first, 70% elsewhere, rising to 90% in all areas by late morning.

Low Cloud and visibility: Areas of scattered or broken cloud with bases 400-600m at first in the morning, mainly around the Snowdon/Yr Wyddfa Range at first. Bases lifting largely above summits from late morning, although some temporary reductions possible with limited patches possible to around 600-900m in the afternoon, mainly in the north. Generally very good visibility but with slight brief reductions in any showers.

Meteorologist's View

UV levels will be high in the afternoon during any sunnier periods.

Forecast for Wednesday 19 Jun 2024

Weather: Dry overnight with clear spells, though probably turning hazy around dawn. A fine, widely dry day following with warm spells of sunshine, these most prolonged during the early morning and from mid-afternoon onwards. A very slight chance for an isolated light shower to develop across the Snowdon/Yr Wyddfa Range in the afternoon. Winds generally light through the day and becoming more variable in direction. Remaining fine into the evening.

Maximum wind: North-westerly 5-10mph, gusts 10-15mph.

Chance of cloud-free hill tops above 800m: 70%, becoming 95% by mid-morning.

Low Cloud and visibility: Isolated patches of cloud above 600m overnight until mid-morning mainly in the north, otherwise bases well-above summits through the day. Rather hazy early morning, but improving to become very good thereafter.

Temperature: **Valleys:** Plus 8 degrees Celsius, rising to Plus 16 degrees Celsius.
At 800m: Plus 7 degrees Celsius, rising to Plus 11 degrees Celsius.
Freezing level: Above summits.
